

Clean Energy & Technologies Mission United Kingdom & Europe: May 09

International momentum towards developing sustainable energy sources and improving energy efficiencies for all sectors of society is increasing rapidly. As the Western Australian Government's key economic development agency, the Department of State Development is developing a program of market visits, in partnership with industry and other interested stakeholders, to better link with and understand critical developments.

In May 2009, an industry mission will target leading decision makers in this sector in the United Kingdom and Western Europe. The developed economies of the European Union have long been at the forefront of issues relating to energy diversity and security and the nexus with climate change remediation.

State Development, through its Perth and Europe offices, is partnering with the Australian British Chamber of Commerce, WA Sustainable Energy Association, Austrade, UK Trade & Investment and Delegation of the European Union to address the specific objectives of each mission attendee.

A customised itinerary will be provided for each participant courtesy of the combined resources and support of the above partners. If your company or organisation has an interest in any of the following objectives then your involvement is encouraged:

- Commercial partners, distributors and clients
- Research partners and grant programs
- Government agencies and programs
- Investment and infrastructure providers
- Technology and project developments
- Global and regional policy developments
- Gather market intelligence and reconnaissance

While each participant will have a customised program, mission timing is such that certain events will have a degree of collective interest. However, event attendance is not mandatory as the mission aim is to maximise your own objectives. Anchor events will include:

- Industry and country briefings for the United Kingdom in London
- Attendance and briefings at the All-Energy Expo in Aberdeen
- Industry briefings for the European Union in Brussels
- Attendance and briefings at the Carbon Expo, Barcelona, linking in with Austrade.

State Development will meet the cost of customised itineraries, industry briefings and mission coordination. Travel costs are at the expense of individual participants. Hotel block bookings will be made for those attending All-Energy, Brussels and Barcelona, where sufficient interest is indicated.

If you believe your organisation will benefit from joining this mission to the United Kingdom and Europe, kindly complete the attached form and return by no later than Monday 23 March 09 to:

Ms Ann Kennish, Chair
Australian British Chamber of Commerce
